Our University Partners

Your first step to Success

Our Diploma in Information Technology is a two-year course designed to equip students with the skills required to be effective and efficient IT professionals who are able to make an impact in the industry. Students are assessed on a combination of course work, assignments and written examinations. The subjects cover the latest advancements in IT so that graduates are well grounded and up-to-date before they enter the competitive workforce.

Why are we unique?

- We expose students to both the knowledge and skills needed to manage an organization's computing infrastructure as well as provide effective user support.
- Students will be well prepared with the techniques needed to analyse, design and implement software systems at the junior management level.
- Students will have opportunities to develop IT business ideas and apps.
- We prepare students with a business foundation so that they will be able to venture into entrepreneurial projects.
- We connect students to exciting internship opportunities with industry leaders.
