

DIPLOMA IN INTERIOR DESIGN

This programme is designed to equip students with practical and theoretical knowledge with awareness of the social, environmental and industrial implications. Our module offers the highest level of visual and computer literacy in CAD, technical drawing skills and the latest 3D modeling software. It embarks on the enrichment journey through the development of design, conceptual creativity, theory and philosophy of spaces to create exciting and practical environments in which people live, work and play.

OBJECTIVES

Upon the completion of this programme, students should be able to:

- Understand the basic concepts in the discipline of Interior design and Architecture
- Apply hands-on skills taught in relation to visual representation of ideas
- Demonstrate relevant skills in interior design including sketching, rendering, Adobe Photoshop, AutoCAD and 3D Max Design
- Communicate effectively with clients with proficient English command

CAREER

Graduates of the Diploma in Interior Design programme will have the opportunity to further their studies to a Bachelor Degree in related fields at local universities, and are qualified to apply for the positions below:

- Retail Sales Designer
- Residential Design Consultant
- Rendering Artist
- Showroom Designer
- Professional Interior Designer
- Model Builder
- CAD Specialist
